

Process Validation Report
Assembly Line #2 – Adhesive Application
Date: 2024-12-15
Prepared By: QA Team

Overview:
Assembly Line #2 is responsible for applying adhesive strips (CMP-2002) to devices.

Key Metrics:

- Application precision: 95% (Target: $\geq 98\%$)
- Adhesive bonding strength: 8/10 (Target: $\geq 9/10$)

Validation Observations:

- Issue: Adhesive material inconsistencies noted
- Impact: Reduced bonding strength during high-humidity production cycles
- Recommendations:
 - Evaluate alternative adhesive formulations
 - Conduct additional training for operators
